AL390H

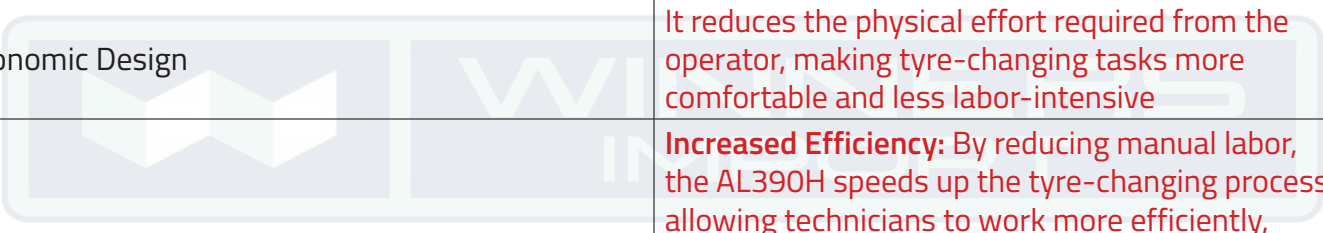

Assist/helper arm for BP889N

Model: AL390H

Product: Assist/helper arm for BP889N tyre changer

Description: The AL390H assist arm is designed to enhance the performance of tyre changers like the BP889N or similar models, improving efficiency when dealing with low-profile and run-flat tyres. This arm provides additional force and leverage, reducing the physical effort required for tasks like bead breaking and mounting, particularly on stiffer, larger tyres.

Features:	Benefits:
Assisted Bead Breaking and Mounting	It provides additional leverage for breaking the bead of low-profile and run-flat tyres, which are typically more difficult to handle due to their stiffer sidewalls
Pneumatic Control	The arm is pneumatically controlled, which allows for smooth, controlled movements, improving the precision of tyre mounting and demounting operations.
Heavy-Duty Construction	Built to withstand the rigorous demands of daily use, the AL390H is made from durable materials that ensure long-lasting performance
Ergonomic Design	It reduces the physical effort required from the operator, making tyre-changing tasks more comfortable and less labor-intensive
	Increased Efficiency: By reducing manual labor, the AL390H speeds up the tyre-changing process, allowing technicians to work more efficiently, particularly with larger or stiffer tyres
	Reduced Risk of Damage: The precision and control offered by the assist arm help prevent damage to rims and tyres during the mounting and demounting process, particularly when working with sensitive tyre types like run-flats
	Improved Safety: By minimizing the physical strain on operators, the AL390H improves workplace safety and reduces the risk of injury
	Versatility: It is suitable for a wide range of tyre types, from standard to run-flat and low-profile tyres, making it an essential tool for any professional tyre service shop
	Technicians can be professionally trained to use the machine and get the maximum benefit from it.
Training available	
1 year warranty	The machine will be repaired if there are any factory faults and can be replaced if required.
Spares available	Should you have a breakdown you will not have to wait for your machine to be repaired. If there is anything we don't have, we fly it in directly from the Suppliers.
