Experience the European difference

BP889N

Fully Automatic tyre changer

Model: BP889N

Product: Fully automatic tyre changer

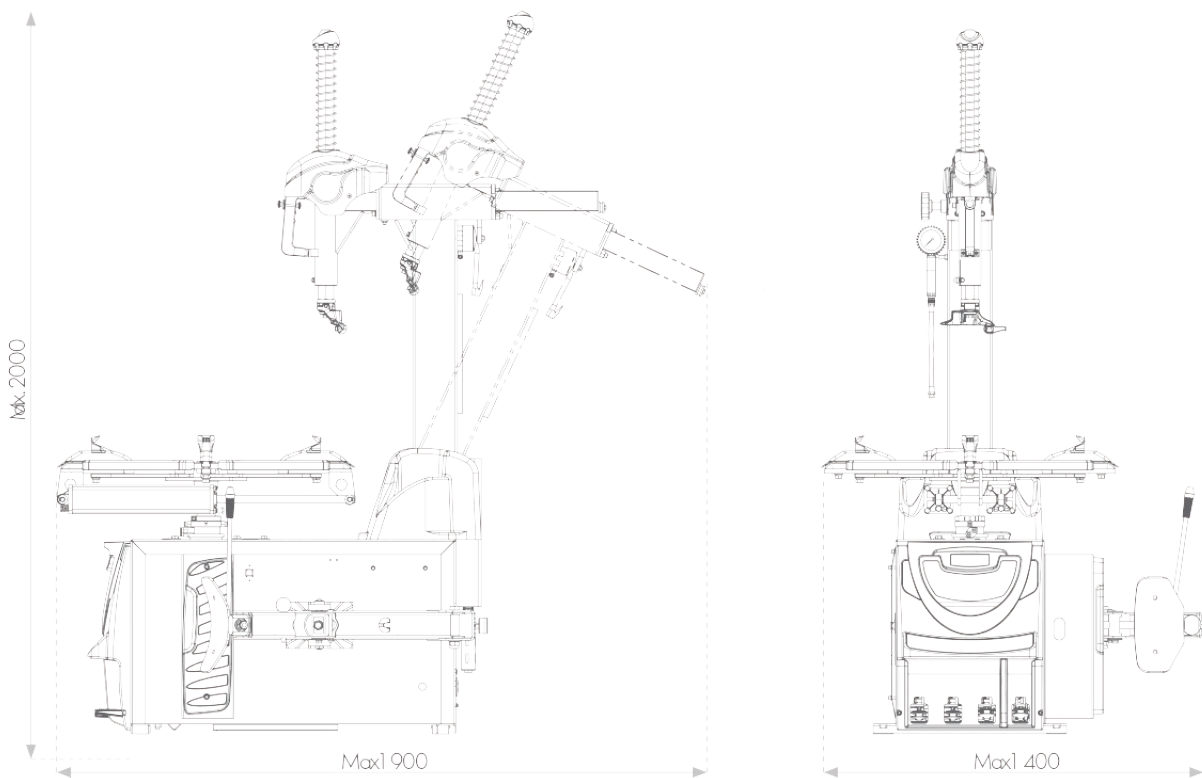

Description: The BP889N Tyre Changer from Bright is a high-performance, fully automatic machine designed for efficient and precise tyre mounting and demounting. Equipped with a pneumatic tilting arm, a robust turntable, and a powerful bead breaker, the BP889N is ideal for handling a wide range of tyres, including low-profile and run-flat types. Its durable construction and user-friendly controls ensure reliability and ease of use in busy workshops, making it a versatile choice for both standard and specialty tyre services. Designed and Engineered in Europe.

Features:	Benefits:
Designed and Engineered in Europe	Italian made
Fully Automatic Operation	The BP889N is designed for ease of use with automatic functions that streamline the tyre mounting and demounting process, improving efficiency.
Pneumatic Tilting Arm	The machine's pneumatic tilting arm allows for quick and smooth positioning, accommodating different tyre sizes and reducing operator effort.
Manual Bead Breaker	A bead breaker is used to "break" or loosen the tyre's bead (the part of the tire that seals onto the wheel) from the rim. Precision control over the pressure applied to the tire, which reduces the risk of rim damage and increases reliability.
Robust Turntable	The heavy-duty turntable ensures a secure grip on the tyre, with jaws that adjust to different rim sizes. This offers stability and precision during operation.
Precision Inflation System	The tyre changer comes with a built-in inflation system that allows precise control over tyre pressure, ensuring safe and consistent inflation.
Run-Flat and Low-Profile Tyre Compatibility	Specifically designed to handle challenging tyres, including run-flat and low-profile models, providing versatility for various tyre services.
Ergonomic Design	The machine's user-friendly design includes conveniently placed pedals and controls, reducing operator fatigue and increasing workflow speed
Durable Construction	The BP889N is built from high-quality materials, ensuring long-lasting durability and reliability in a high-volume workshop environment.
	Increased Efficiency: The automatic features and pneumatic arm improve the speed and accuracy of tyre changing, boosting productivity in the workshop.
	Reduced Operator Fatigue: The ergonomic design and automation features reduce manual effort, helping operators perform tasks with less physical strain.

Warranty terms

	Versatility: Capable of handling a wide range of tyres, from standard to high-performance types, including run-flat and low-profile tyres, making it a versatile tool for workshops.
	Enhanced Safety: The powerful bead breaker and precision inflation system enhance safety, preventing damage to tyres and rims while ensuring proper inflation.
	Durable and Long-Lasting: The high-quality materials and robust construction provide a long operational life, reducing maintenance costs and downtime.
	Better Customer Service: Faster, more reliable tyre changes improve customer satisfaction, helping workshops manage higher volumes with confidence.
Training available	Technicians can be professionally trained to use the machine and get the maximum benefit from it.
1 year warranty	The machine will be repaired if there are any factory faults and can be replaced if required.
Spares available	Should you have a breakdown you will not have to wait for your machine to be repaired. If there is anything we don't have, we fly it in directly from the Suppliers.

Technical information	
Outside clamping	11" - 24"
Inside clamping	13" - 26"
Rim width	3" - 14"
Max wheel diameter	1100 mm
Working pressure	8 - 10 bar
Bead breaking force	2800 kg
Power supply	220V
Motor power	0.75Kw / 1.1Ke
Rotation per minute	6.5/13 rpm
Noise	<70 dB
Machine dimensions	1900*1400*2000 mm
Packaging dimensions	1150*920*1000 mm
Net weight	290 kg
Gross weight	320 kg

Optional extras

Assist helper arm AL390
