SD12b

Static wheel balancer for motorcycles

Model: SD12B

Product: Static wheel balancer

Description: The SD12B has been the choice of motorcycle technicians for over twenty years, why? Because its the best! With four precision metal shielded bearings and a level adjustable frame, the Static Wheel Balancer will suit most motorcycle wheels.

Technical information:

The stand out feature is the standard 10mm Stainless Steel shaft, CNC machined cones, can do up to 23" tyres

Features:	Benefits:
Four high quality shielded roller bearings.	Ensure friction free balancing
Grub screws used to secure the cones to the axle	Eliminates damaging the shaft. A common issue with cheaper alternatives.
Universal tapered cones	Enable fast and easy setup.
Fully welded construction.	For perfect alignment.
Suits all metric wheel bearing sizes from 10mm up to 35mm in size.	Virtually all modern motorcycles
	Improved Customer Satisfaction: Properly balanced wheels lead to a smoother ride and better handling, enhancing customer satisfaction.
	Increased Reputation: Offering precise wheel balancing services demonstrates professionalism and expertise, enhancing your shop's reputation. Satisfied customers are more likely to return and recommend your services to others.
	Enhanced Safety: Balancing wheels ensures that the motorcycle operates safely, reducing the risk of accidents caused by imbalanced wheels. Improved safety can lead to fewer liability issues for your business.
	Cost Savings: Properly balanced wheels experience less wear and tear on tyres and other components, potentially extending their lifespan. Reduced wear and tear can save your customers money on replacements and repairs, making your services more appealing.
	Competitive Advantage: Having a static wheel balancer sets your business apart from competitors that may not offer this service. It allows you to attract customers who prioritize quality and safety in their motorcycle maintenance

	Efficiency: Static wheel balancers are easy to use and provide quick results, increasing the efficiency of your service operations. Faster service turnaround times can lead to increased customer loyalty and word-of-mouth referrals.
	Increased Revenue: Offering wheel balancing as an additional service can generate extra revenue for your business. Customers may choose your shop over others if you provide comprehensive motorcycle maintenance services.
	Maintenance Contracts: You can offer maintenance contracts that include regular wheel balancing, providing a steady stream of income for your business. Contracts can lead to long-term customer relationships and increased customer loyalty.
Training available	Technicians can be professionally trained to use the equipment and get the maximum benefit from it.
1 year warranty	The machine will be repaired if there are any factory faults and can be replaced if required.
Spares available	Should you have a breakdown you will not have to wait for your equipment to be repaired. If there is anything we don't have, we fly it in directly from the Suppliers.
