

Model: HJ0802E

Product: 10 ton bench press with gauge

Description: This type of bench press is used in workshops and manufacturing settings for tasks that require applying a significant amount of force, such as bending, pressing, and straightening materials. The gauge allows users to monitor the applied pressure, ensuring precision and safety during operations.

Features:	Benefits:
High capacity	The bench press has a capacity of 10 tons, making it suitable for heavy-duty applications.
Built-in gauge	Equipped with a pressure gauge, allowing for precise monitoring of the force applied during operation.
Robust construction	Made from high-quality, durable materials to withstand heavy usage and ensure longevity.
Adjustable work table	The work table height can be adjusted to accommodate different sizes of workpieces.
Manual Operation	Typically operated manually, providing greater control over the pressing process.
Safety Features	Includes safety mechanisms to prevent overloading and ensure user safety.
Versatile Use	Suitable for various applications such as bending, straightening, and pressing components in automotive, metalworking, and other industries.
Precision	The gauge provides accurate readings of the applied force, allowing for precise and controlled pressing operations.
Efficiency	The high capacity and robust design make it efficient for heavy-duty tasks, reducing the effort and time required.
Versatility	Can handle a wide range of materials and applications, increasing its usefulness in different industrial settings.
Durability	Built to last with strong materials and construction, ensuring a long service life even under heavy use.
Safety	Safety features help prevent accidents and injuries, making it safer for operators to use.
Adjustability	The adjustable work table allows for greater flexibility in handling various workpiece sizes and shapes.
User control	Manual operation provides operators with greater control over the pressing process, enhancing precision and quality.

10 Keymax Park, 1006 Ergon road, Lyttelton Manor, Gauteng

Training available	Technicians can be professionally trained to use the equipment and get the maximum benefit from it.
1 year warranty	The machine will be repaired if there are any factory faults and can be replaced if required.
Spares available	Should you have a breakdown you will not have to wait for your equipment to be repaired. If there is anything we don't have, we fly it in directly from the Suppliers.

Technical information	
Capacity	10 ton
Stroke	175 mm
Working range	110 - 364 mm
Bed width	336 mm
