Easy mount & demount kit
(Tubeless truck tyres)

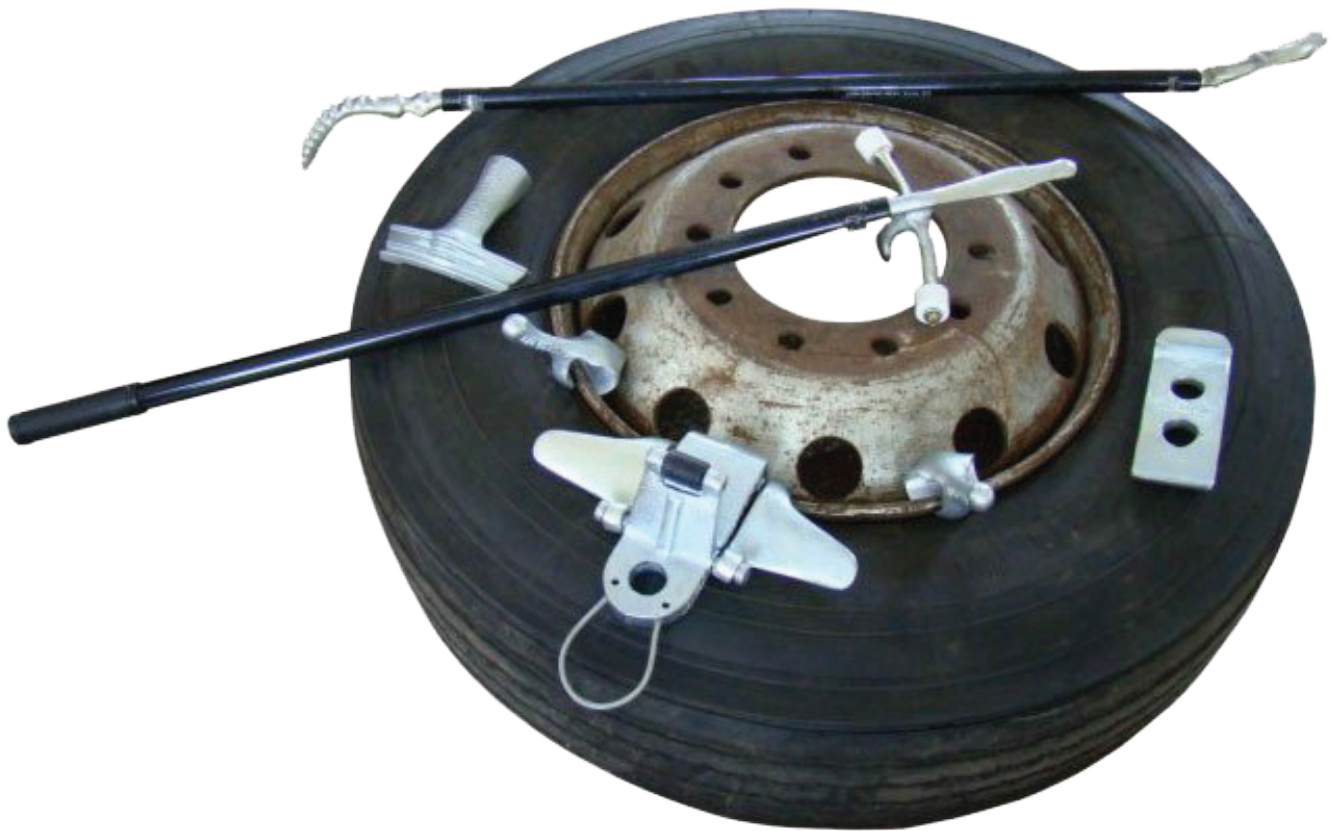

Model: S-207-8

Product: Easy mount and demount kit

Description: The Easy Mount/Demount Kit has become the industry standard for changing tubeless truck tyres. By using simple principles of leverage. The Easy Mount/Demount Kit actually works with the tyre and rim to do the work for you, in less time, with less strain at a fraction of the cost of tyre changing machines. The Easy Mount/Demount Kit mounts and demounts all tubeless truck tyres from 17.5" up to 24.5" and all super singles. It's the safest, fastest, and easiest way ever invented to change tubeless truck tyres – guaranteed not to damage tyre beads.

Features:	Benefits:
Beaver tail bar	The beaver Tail Bar is used for removing the second bead on tyre sizes larger than 315/80R22.5.
Lever bar	Change tubeless truck tyres quickly without bead damage. Designed to protect beads and reduce truck downtime. Complete Set mounts and demounts every tyre from 17.5" to 24.5" including all wide base sizes.
Bead keeper	A bead breaker is a tool used for assisting in the mounting process. Bead keepers simply lock onto the flange of the wheel and holds the tyre bead in place to eliminate standing on the tyre and/or chasing the bead around the wheel.
Clevis	Change tubeless truck tyres quickly without bead damage. Designed to protect beads and reduce truck downtime
Bead breaker chisel / wedge	Assisting tool to break the bead
Fitting plate (on/off plate)	Assisting fitting and stripping of tyre
Carry case	All small items can be carried effortlessly inside the bag
	Time and Labor Savings: A truck easy mount and demount tool kit can significantly reduce the time and effort required to replace truck tyres. This is crucial for commercial and fleet operations where minimizing downtime is a priority.
	Reduced Physical Strain: The ergonomic design of the tools helps reduce physical strain on the technicians or mechanics performing tyre changes, improving workplace safety and comfort.
	Versatility: These tool kits are versatile and suitable for a range of truck tyre sizes and types, providing a one-stop solution for tyre replacement needs.

	Minimized Tyre and Rim Damage: The use of proper tools, such as rim protectors and bead keepers, helps minimize the risk of damaging both the tyre and the wheel rim during the mounting and demounting process.
	Increased Efficiency: The streamlined process facilitated by the tool kit results in increased overall efficiency, enabling more tyres to be replaced in less time
	Cost Savings: By reducing the risk of damage to tyres and rims and improving efficiency, a tool kit contributes to potential cost savings for maintenance and repair operations.
	Improved Safety: Using specialized tools designed for the task enhances safety by reducing the likelihood of accidents or injuries associated with manual tyre changing methods.
Training available	Technicians can be professionally trained to use the equipment and get the maximum benefit from it.
1 year warranty	The machine will be repaired if there are any factory faults and can be replaced if required.
Spares available	Should you have a breakdown you will not have to wait for your equipment to be repaired. If there is anything we don't have, we fly it in directly from the Suppliers.
